1999 - 2005 | Romania

Project Experience

EventSnap - *eventsnap.herokuapp.com*   December 2017

- designed and developed a QR code generator and reader full-stack WebApp that allows event organizers register guests and monitor custom check-ins in real-time.
-

Community Website - *hungarianclubofchicago.com*   July 2016

- Designed and developed a multipage website using WordPress
- Implemented shopping cart, form and social media plug-ins for better event and news representation in real-time.

Arcade Game Frogger - *evasimon.me/frogger*   January 2016

- Created an interactive arcade game using an existing game engine
- Implemented Game objects using JavaScript OOP features

Glass Coat Photo Booth - *glasscoatphotobooth.com*   June 2015

- Converted six pages of existing static website into responsive design
- Combined fluid grid with media query design improving on-line user experience across all devices

Work Experience

Web Developer / Technical Project Manager
@absupply.net   Chicago | November 2010 - Present

- Developing an Image Handleing Tool for generating various image sizes using Grunt
- Collaborating with senior developers in re-designing the Product Information Management System to optimize product presentation and order processing
- Enhanced bulk product upload process by designing and developing VBA templates to enable upload of thousands of products simultaneously
- Integrated YouTube videos and functionality into company's video gallery page retrieving data using YouTube API and AJAX
- Trained, supervised, and led activities for the data-entry team

Front-End Web Developer
@DESIGNATION Labs   Chicago | March 2015 - September 2015

- Translated design prototypes into functional, responsive websites
- Designed mobile and web apps, practicing agile methodology in team settings
